CD / DIGITAL

REGGAE / WORLD / NIGER

Cosmopolitan nature !

More than ever, the protection of our planet is important and concerns each and every one of us.

Salim Jah Peter the words and the deeds (Reggae Vibes Magazine)

After "Les Vautours" and "Hold up du Pouvoir" this third album "Nature" from the Nigerian artist is composed of fifteen tracks and was the last cosmopolitan album recorded at the studio Davout. Salim Jah Peter invited artists such as Winston McAnuff, Sheik Tidiane Seck, Mamani Keita and Devi Reed. The sounds of the brass and the intoxicating rhythms of the percussion accentuate the groove of this cosmopolitan opus. The difference is a richness that the artist advocates. Through his african melodies, his roots reggae, his african blues and his new creation "aye aye groove" a mix of afro-beat and traditional Niger music and strong texts, the album "Nature" comes to awaken consciences.

*Full of humor and generosity never ceasing to share his positive energy with his audience. In his gravelly and recognizable voice, **Salim Jah Peter** denounces the scourges of humanity. **Listening to his previous projects, we note here a true artistic direction and special care given to the production which brings to mind the mythical foundations of the genre.***

*Artists such as **Salim Jah Peter** pledge their support, witnessed by their investment with the association "Racines Profondes" and its project "Nature Eco France Africa" which could also be called "**Nature Eco Tour**". **Nature, our common root**, Salim Jah has made it a song, become the hymn for nature our mother earth, Respect and common values have brought together this engaged artist and the association, a story where every gesture counts. Let's keep smiling!*
