

## TAJ WEEKES • Climate Justice

• Lyrics •

### *Chorus*

The sun still rises, rivers still flow  
We can power tomorrow with the winds that blow  
But we must rise, raise our voice,  
let climate justice guide our choice.

### *Verse*

We built this world on coal and greed,  
But now the earth is crying out in need.  
The answer's shining from skies above  
A gift of light, a solar love.

### *Bridge*

Turn the tide, there's a better way  
A future that's clean and here to stay.  
From all we know and done is wearing thin  
There's so power in the forgiving wind.

### *Verse*

We start the fire and burn the ground  
Digging deeper 'til there's nothing found.  
The skies turns grey from all we've done  
But there's still Hope in the water wind and sun

### *Chorus*

The sun still rises and the rivers still flow  
We can power tomorrow with the winds that blow  
So come come rise up, raise your voice,  
let climate justice guide our choice.

*Bridge*

So rise with up and let us save  
let's heal what our hands have frayed  
A future that's clean and here to stay.  
Cause really that's the only way

*Chorus*

The sun keeps rising, the wind keeps blowing,  
We power tomorrow with what we sow Islands rise up and raise your voice,  
let climate justice guide our choice.

We must raise  
Raise our neglected voice  
let climate justice guide our choice.

A natural solution is the only solution
